DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-6,8-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Adat et al. Adat et al. shows the use a backrest comprising : a back member (Fig. 1) having an upper and lower region; a frame member (5), a sacral support member (13,35,35A) having at least one end connected to one of the frame member and the back member and an opposite free end (Fig. 14AB), wherein the sacral support member supports the back member at the lower region thereof; a fulcrum (41) member moveably disposed between a portion of the sacral support member and one of the frame member and the back member, wherein the fulcrum member is moveable toward and away from the free end of said sacral support member. Adat et al. shows the sacral support member comprises a first support member (35) flexibly connected to a second support member (13) at the free end of the sacral support member. Adat further shows that the second support member is supported by a lumbar support member (49). In regards to claim 8, center portion of the back member (49) is flexible as shown in Fig. 9B.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3636

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 12-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Adat et al.

Adat et al. shows all of the teachings of the claimed invention. The method steps as recited

would have been incorporated within the use of the invention as taught by Adat et al.

Allowable Subject Matter

5. Claims 7 and 17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Reference Nos. 6,755,467, and 5,385,388 show other sacral support system.
